

Company Profile

BHAWANI TECHNOLOGIES is a well diversified organization with various profiles and has various divisions, working towards different directions, these may be merely tools for endorsing a **BRAND**, but with our creative & technical staff, they make an unbeatable combination. With the best minds working in the right direction, the tools they use should be nothing less than the best.

Construction Chemicals Divisions (Offering Construction Chemicals)

We were always clear that to make **BHAWANI TECHNOLOGIES** an enduring brand and an eternal organization, we need to create sense of belonging. While **BHAWANI TECHNOLOGIES** has been growing tremendously over the years, so have the bunch of talented and dedicated people who have made it possible. Not surprisingly, we have perhaps the lowest attrition rate in the industry.

Construction Chemicals Divisions (CCD)

BHAWANI TECHNOLOGIES's CCD is into Trading and Application of Construction Chemicals.(Waterproofing & Industrial Epoxy Floorings). Below are the ranges of products.

- Floor Hardeners.
- Epoxy Floorings & Coatings
- Polyurethane Floorings & Coatings.
- Water Proofing Admixtures & Coatings.
- Curing & Sealing Compounds
- Hi-Flow Grouts & Tiles Grouts
- Adhesives & PU/Polysulphide Joint Sealants
- Coating for corrosion protection (Anti-Corrosive Coatings)
- EPDM Membranes
- APP Membranes
- Drain Cells/Boards
- Grass Pavers
- Woven & Non-Woven Geotextiles.

Core Competencies

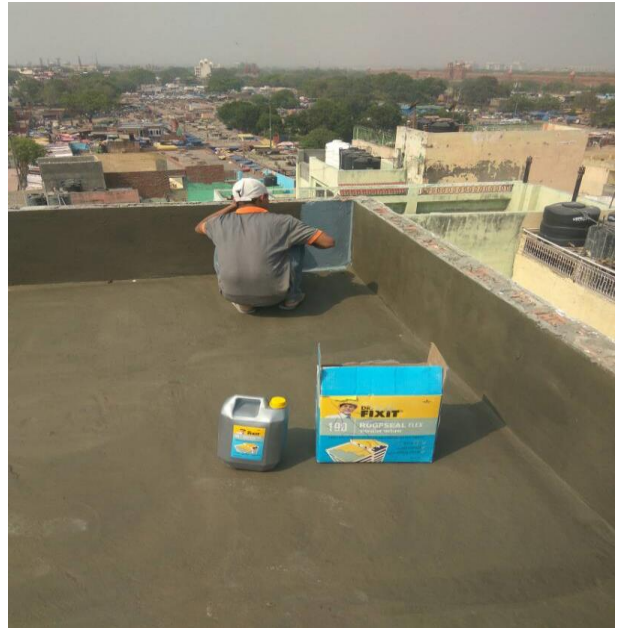

- Consultative Approach [CA]: BHAWANI TECHNOLOGIES follow a very Consultative approach, our Marketing & Technical members would first ask you about your business, your goals and they say *WHAT WE CAN DO ABOUT IT* and offer products accordingly.
- Operational Excellence. [OPEX]: A methodology for solving the problems & continuous improvement of products & process through pursuit, acquisition & utilization of knowledge, using critical taught and planned experimentation helps us to achieve Operational Excellence.
- Authorized Applicators [AA's]: BHAWANI TECHNOLOGIES is having a team of APPLICATORS, authorized by parent company, for improving the quality & Performance of Products.

COMPANY INTRODUCTION

BHAWANI TECHNOLOGIES, with Aim of Providing a complete range Of Technical And Industrial Textile Products. The Details of the Product range are as below.

Some Of Our Main Products Are:

1. Woven GeoTextiles
2. Non-Woven Geotextiles
3. Fiberglass Mesh
4. Draincells, Drain Boards and Grass Pavers
5. Filter Cloth & Canvas Cloth.
6. Geomembranes & Pondliners.
7. Filter Bags & Filter Cloth (Sleeves for Perforated Pipe)
8. APP Membranes.
9. EPDM Membranes.
10. Shade Fabric & Shade Nets.
11. Heat Reflective paints for External Facade & Roof Top
12. Tapcreate coating

Geotextiles Are used in Landscaping, Waterproofing, Erosion Control, Sports field, Golfcourses, Terrace garden, Dams, Canals, Tunnels, Horticulture, Industrial Buildings, Roads, Paved & Unpaved Surfaces, Highways, Airport, Runways etc.

Woven Geotextiles are made from Weaving, High tenacity PP & Polyester, Multifilament Yarn. We Supply this fabric, which was manufactured with Fully Automatic Dornier Looms. We are the suppliers of Polypropylene Woven geotextiles with tensile strength Extending up to 300 kn/m. We can supply Geotextile up to 3.8 Mtrs width.

Geotextile Bags & Geotextiles tubes are made from the above woven Geotextile According to one Needs and Specification.

Non Woven Geotextiles:

Non Woven Geotextile is made by needle punch, thermal or chemical bonding. Fibers are carded and needle punched & then bonded thermally to form nonwoven fabrics. The manufacturing Process involves manufacturing of nonwoven fabric from polyester or PP fibres. We Supply from 15gsm to 900 gsm. The Nonwoven Geotextile fabric maintains a uniform settlement of the sub grade & hence improves the sub grade strength & produce long life of the system. We can supply up to 6.5 Mtrs width.

Shade Fabric & Shade Nets :

These U.V fabrics are used to provide protection to the plants from sunlight, wind and other weather conditions. They have widespread application in Floriculture, horticulture, and the tea plantation industry. Our Shade fabric and shade nets are demanded by clients across the country due to their performance that goes on for a durable period. Contact us for further information about the product

Fiber Glass Mesh :

Fiberglass mesh is manufactured by weaving from fibre glass yarn. It has excellent properties like high strength alkali resistance, water resistance, flexibility, softness and resistance to aging. It is used for water proofing on roof in almost all types of structures i.e. buildings of residence, industrial or commercial, hospitals, multiplexes, schools, colleges, metro stations etc. It helps in reducing the wear and tear of the roofs. It is a high heat and chemical resistance material therefore provides a good insulator and stops the heat from the roof making the top floor cooler.

Filter Cloth :

The Company has achieved a wide recognition in supplying different types of filter cloths manufactured with an automatic German Dornier Looms like cotton, polyester, polyamide, PP Nylon, Fiber glass, in spun, Multi filament and Monofilament fabrics in all the weaves i.e. Plain, Twill, Drill, Satin, Oxford, and Crawford etc.

We can offer up to 144" Widths ranging from 200gsm to 1500 gsm Quality. Different types of processes on filter fabric are also performed, i.e. processed, Silicon treatment and Anti-Static

Filter Bags :

We offer a range of filter bags that can be used in dust collection and filtration purposes. in almost all the industries filter bags are used in several useful applications. Following are the industries where filter bags are used :

Effluent treatment plant, Bag house, Filter Presses Industries like Vanaspati, Refineries, Cement, Pharmaceuticals, Chemical, Fertilizer, Thermal Power Plants, Sugar, Biscuits, Mines, Coolant, Paints, Varnishes Etc.

Geomembranes, Pondliners :

We also provide HDPE, LDPE, film/sheet/liners for various applications. Our HDPE, LDPE, film/sheet/liners have got huge exposure among a wide base of Client all over India. They are used for a number of applications including the following:

Agriculture purpose, Lining of canal, reservoirs, Lining of industrial Effluent plant, Tunnels, Packing, Wrapping, Water proofing of terrace garden, For protection of food grains etc.

For further enquiries and information, please contact us.
